

Case Study – Construction & Built Environment

Appointment: Project Director, Kier Nuclear

Client:

Kier are one of the UK's leading property, residential, construction and services groups operating both nationally and internationally across a range of sectors including defence, education, housing, industrials, power and utilities.

Challenge:

Appointed by the Civil Engineering division to find a proven Project Director with specialised experience of working in large Civil new build programmes in the regulated nuclear environment, together with a detailed understanding of the constraints and challenges this environment imposes.

Our Solution:

With detailed sector knowledge we presented 3 potential candidates for the position within agreed timescales and exceeded client expectations for such a niche and complex position.
