

Case Study – Energy and Renewables

Appointment: Head of Service & Maintenance, GI Energy

Client:

A market leader in the provision of world class energy renewable solutions operating within the commercial, healthcare, residential, public sector and infrastructure sectors.

Challenge:

With the fast changing pace of the energy market and the continued pressures to control and reduce costs; we were appointed to source a Head of Services and Maintenance. The ideal candidate had to demonstrate a proven ability to drive change and manage costings within the organisation whilst responding to the ever changing legislative requirements in this regulated environment.

Our solution:

Our previous exposure and reputation in the market meant quick and easy access to a strong pool of talent across a variety of disciplines. With a full and detailed understanding of the brief and candidate requirement and insight from previous projects we were able to appoint within shorter time scale than anticipated.
